

LEVEL UP!

Your clinical education programme

LEVEL UP! PROGRAMME

Our unique and modern education programme built for healthcare professionals, enabling precision care and patient focus.

LEVEL UP!

PROGRAMME

for a system Start Up

Prepare your installation with a tailor-made education ensuring confidence to provide the best possible care.

GET READY

Define your team's application and pre-training needs, and set the agenda of your onsite training.

Our education plan for an efficient on-site training includes:

- Preparation call to discuss your needs and expectations with you
- Definition of the onsite training agenda
- Setting up remote pre-training sessions*
- Access to our Digital Academy Online learning platform

Outcomes

Get your team prepared for an optimized onsite training experience and a faster onboarding.

**if applicable*

GET STARTED

Our Clinical Education Specialists will come to your site and provide a comprehensive tailored training programme.

Our goal is to train the radiographers and radiologists to a level where they can operate the equipment independently with a maximum of confidence.

- Safety Training
- Foundationals Training
- Perform routine exam
- Move to advanced exams/options

Outcomes

Educate core team on safe and effective use of their GE HealthCare product.
