

OnWatch™ Predict

24/7 Remote monitoring and predictive analytics

OnWatch Predict provides peace of mind by remotely monitoring and predicting impending failures of critical components in your MR system, helping to convert unplanned downtime into a planned service event.

Driving predictive, preventive, planned maintenance

Reduce disruptions. Enhance care.

Reduce unplanned downtime and limited use of system¹

Make equipment service work with your schedule — not vice versa

Expedite and streamline necessary repairs with planned labor on site

Maintain excellent image quality

Reduce customer-initiated service requests¹

+4.5 days per year of increased uptime¹

Greater confidence and convenience. For your team and your patients.

Remotely monitors and predicts impending failures of critical components

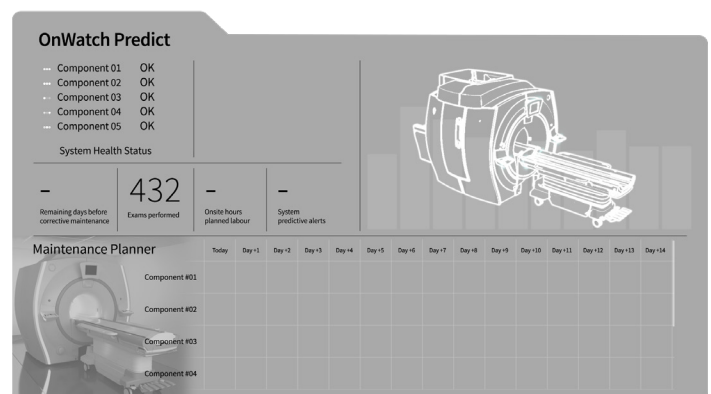

Watching out for you 24 hours per day, 7 days a week

Advance planning to ensure the availability of any required replacement parts

Wing-to-wing service delivered with step by step communication about your service through MyGEHealthCare
