

# Continuity™ Premium

## for Mammography

### Advancing your vision for clinical care

#### Clearing your path to clinical advancement

You're always looking for what's new and next for your patients—the latest advancements you can leverage to deliver faster, more accurate care. But making it happen is a different matter. Is your equipment ready? How will you handle the time-consuming, budget-stressing challenges of purchasing, installing and managing technology upgrades? Turn to GE HealthCare.

The Continuity program keeps your technology investments up to date with the latest capabilities over the lifecycle of your GE HealthCare Imaging Systems. Instead of struggling with fragmented upgrades, you can add Continuity to your standard service contract to receive ongoing, automatic software and hardware upgrades.

These regular upgrades bring modern performance to your imaging equipment—not only extending the useful life of your assets, but providing being able to host new clinical capabilities. Furthermore, you gain the peace of mind knowing you can continue adding value to your investment and drive your vision forward with predictable, lower costs.

### Prepare your imaging platform for a changing environment

#### Deliver high-quality care

- Be ready to expand clinical capabilities when upgrades become available
- Enable growing and diversified examination needs
- Help enhance staff and patient satisfaction

#### Optimize asset lifecycle

- Protect your investment by keeping your assets current
- Efficiently manage technology upgrades
- Help with department standardization

#### Enhance financial performance

- Simplify budgeting
- Benefit from predictable, lower upgrade costs
- Help improve asset planning capabilities

## The mammography potential value of Continuity

Potential savings on future Senographe Pristina upgrades with Continuity\*\*

	Continuity Term					Total
	1	2	3	4	5	
	System software	System software			PC Hardware & system software	
Without Continuity	\$10,000	\$10,000			\$25,000	<b>\$45K</b>
With Continuity	\$5,500	\$5,500	\$5,500	\$5,500	\$5,500	<b>\$27.5K</b>

39% savings

Potential savings on future Seno Iris upgrades with Continuity\*\*

	Continuity Term					Total
	1	2	3	4	5	
	System software		System software		PC Hardware & system software	
Without Continuity	\$7,500		\$7,500		\$20,000	<b>\$35K</b>
With Continuity	\$4,500	\$4,500	\$4,500	\$4,500	\$4,500	<b>\$22.5K</b>

36% savings

\*Technologies in development that represents ongoing research and development efforts. These technologies are not products and may never become products. Not for sale. Not cleared or approved by the FDA for commercial availability. Not CE marked.

\*\*The first example assumes a system software upgrade at year 1 and between 2/3 of the Continuity agreement and a PC hardware and system software upgrade at year 5 of the Continuity agreement for the Senographe Pristina. The second example assumes a system software upgrade at year 1 and 3 of the Continuity agreement and PC hardware and system software upgrade at year 5 of the Continuity agreement for the Seno Iris. In either case, there is no guarantee that any given system would have such upgrades during the term of the Continuity agreement. The prices reflected are examples of potential pricing and do not represent what the pricing for all such upgrades or the pricing for your Continuity agreement would be. In the event that software system and/or PC hardware upgrades are available for a covered product, pricing will vary depending on the content of the upgrade and the determined sale price for such upgrades.
