

A rural hospital in Montana offers increased access to care with remote scanning

Dahl Memorial Healthcare wanted to offer care closer to home for patients using Imaging 360 Remote powered by nCommand™ Lite*.

This solution empowers radiology staff to access support through remote collaboration and scan assistance. Imaging 360 Remote powered by nCommand™ Lite*, helps remotely connect expert staff to share expertise for training and assistance for complex exams and more.

The use of Imaging 360 Remote powered by nCommand™ Lite*.

"With this technology ... we can keep imaging services local, available and cost-effective while still ensuring patients get the high-quality diagnostic care they need."

"We believe Carter County residents shouldn't have to drive hours for routine diagnostics. [Remote Scanning] brings that vision closer to reality,"

Darrell Messersmith

Hospital CEO at Dahl Memorial Healthcare
